DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 8-16, 17-20, 22, drawn to an electrolyte and a battery comprising the electrolyte comprising an electrolyte salt LiPF₄, LiBF₄, LiAsF₆, LiCl₄, LiN(SO₂CF₃)₂, or lithium perfluoro-sulfonate and a first solvent containing an ester, an ether, etc. and contains a second solvent, classified in class 429, subclass 343.
 - II. Claims 7 and 21, drawn to an electrolyte and a battery comprising an electrolyte salt containing LiPF₆:LiBF₄ in a molar ratio from about 9:10 to 50:50 and first solvent selected from EC, PC, DEC, DMC and methyl ethyl carbonate and a second solvent, classified in class 429, subclass 330.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are unrelated because they are not disclosed as capable of use together and have different effects such that Invention I allows for cyclic carbonate, linear carbonate, ester or ether or a mixture with a second solvent versus Invention II limits the molar ratio of the LiPF₆ salt and LiBF₄ salt and a first solvent comprising EC, PC, DEC, DMC or EMC and the second solvent.

Because these inventions are independent or distinct for the reasons given above and

Art Unit: 1745

there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

If pick Invention I then:

3. This application contains claims directed to the following patentably distinct species: nitrile compounds of Formula I or II. If choose, formula I please further define R1, R2 and X. If choose, formula II please further define R6, R7 and R8 and y.

If pick Invention II then:

4. This application contains claims directed to the following patentably distinct species: Please choose a second solvent of nitrile compounds or carbonate compounds cited in claim 7.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

6. A telephone call was not made due to the complexity to request an oral election to the above restriction requirement, therefore an election has not been made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
